Career Objective

Motivated first-year Computer Science student at CvSU-CCAT, passionate about backend development, problem-solving, and building real-world projects. Currently learning HTML, CSS, and C++ with interest in full-stack development and cybersecurity.

Skills

- Backend Programming (C++)

- Full Stack Development

- Data Analytics

- Machine Learning

- Python

- Kali Linux

- Web Development (HTML, CSS)

Projects

Itinera: C++ Travel Itinerary Planner

A console-based itinerary system to help users plan trips efficiently using destination sorting, activity selection, and CSV file handling.

D Ziplyn: Mobile Time Discipline App

An Android/iOS app that limits screen time to promote discipline and prevent digital addiction. Developed using Kotlin and React.

ITEC Website Project

Personal portfolio project built with HTML and CSS, showcasing academic and personal projects as part of ITEC50 coursework.

Education

Bachelor of Science in Computer Science

Cavite State University CCAT Campus

1st Year | Present

Hobbies and Interests

- Playing games: Mobile Legends, Roblox, Valorant

- Exploring tech: Bug bounty, ethical hacking, AI tools

- Coding challenges on LeetCode
